Re: PVSC Industrial Users List
Lower Passaic River Study Area

Dear Sarah:

In its March 31, 2016 letter, USEPA referenced an effort to negotiate with the “major” parties with respect to the implementation of USEPA’s selected remedy for the lower 8.3 miles of the Lower Passaic River (“LPR”). At the recent Passaic River Symposium at Montclair State University, Walter Mugdan stated that USEPA is planning to interact with responsible parties in order to reach a legally binding commitment to carry out the construction of the remedy and also desires to implement cash-out settlements, potentially to include a “*de micromis*” settlement effort that USEPA will initiate in the coming months.

As you are well aware, thousands of parties – including municipalities, other governmental entities, and private parties – have discharged to the LPR, directly or indirectly, over the course of more than a century. To help ensure that all dischargers are properly considered for either performance or cash-out settlements, for USEPA’s consideration we refer the Agency to the enclosed excerpted list of the industrial users (“IUs”) disclosed by liaison counsel for the Passaic Valley Sewage Commissioners (“PVSC”) in the New Jersey State litigation against Tierra, Maxus, Occidental, *et al.*

Representatives for the CPG believe there would be mutual benefit to a meeting to discuss the path forward and for USEPA to receive feedback, including the CPG’s

thoughts and recommendations with regard to PVSC and other potential PRPs. Please let me know if USEPA is willing to meet in this regard.

Please place this letter and the enclosed excerpted list of IUs in the administrative record.

Thank you for your time and consideration.

Very truly yours,
